 Capitao Poco, Brazil

# Summary

Experienced Full Stack Developer with 7 years in designing, developing, and integrating Al-powered applications, cloud infrastructure, and scalable web solutions. Successfully optimized AI retrieval systems, increasing efficiency by 40% and cutting deployment cycles by 60%. Skilled in full-stack development, AI model orchestration, and cloud automation, with experience building and maintaining applications serving over 500K+ users with 99.9% uptime. Well-versed in integrating LLMs, optimizing vector search, and developing secure, high-performance backend architectures. Focused on advancing AI applications, scalable system design, and workflow automation.

## Experience

Chili Piper

New York, United States

Full Stack Developer

04/2022 - 10/2024

• Designed and deployed Al-powered search and recommendation engines using LangChain and Pinecone, improving

- document retrieval accuracy by **50%** and reducing query response times by **35%**.

   Developed and maintained **full-stack applications with React.js, Node.js, and FastAPI**, serving **500K+ active users** while
- ensuring 99.9% uptime.
  Automated cloud infrastructure provisioning with Terraform and Kubernetes, reducing cloud computing costs by 30% and improving resource allocation.
- Built optimized CI/CD pipelines using GitHub Actions and Jenkins, reducing deployment failures by 50% and decreasing release cycles from 2 weeks to 3 days.
- Led a **team of six developers**, ensuring seamless collaboration across **AI**, **full-stack development**, **and cloud automation projects**, boosting productivity by **25%**.
- Conducted load testing on backend services, ensuring they could handle 1M+ API requests daily without performance degradation.

Chili Piper Singapore, Singapore

#### Junior Software Developer

06/2021 - 03/2022

- Reviewed and refactored over 10K+ lines of JavaScript, TypeScript, and Python code monthly, improving system efficiency by 20% and reducing redundancy.
- Implemented **automated testing with Jest and Mocha**, reducing software defects by **35%** and improving overall system stability.
- Improved GraphQL and RESTful API response times by 25% by refactoring SQL queries, indexing databases, and integrating Redis caching.
- Enhanced **CI/CD processes using Jenkins and GitHub Actions**, cutting deployment time by **60%** and ensuring high application uptime.
- Provided mentorship and technical training for **15+ developers**, conducting weekly code reviews and improving adherence to best practices.

# Experience

VINOVA Singapore, Singapore

#### Back End Developer

11/2019 - 05/2021

- Built and maintained scalable RESTful and GraphQL APIs using Node.js and Django, handling 2M+ API requests per month with a 99.98% uptime SLA.
- Enhanced database performance by **40%** through **PostgreSQL query tuning, indexing, and Redis caching**, reducing API response times.
- Created secure **OAuth 2.0 and JWT-based authentication systems** for **100K+ users**, ensuring compliance with industry standards.
- Migrated monolithic applications to **microservices using Docker and Kubernetes**, reducing deployment time by **70%** and increasing scalability.
- Integrated real-time WebSocket communication, improving live data processing speed by 50%.

# Atta Systems

Singapore, Singapore

#### Front End Developer

11/2018 - 10/2019

- Designed a React-based dashboard used by 200K+ users, improving user engagement by 30% and optimizing UI/UX using Material UI and Tailwind CSS.
- Reduced page load time from 3 seconds to 1.2 seconds by optimizing React state management and lazy loading components.
- Implemented **real-time features using WebSockets**, increasing live data processing efficiency by **50%**.
- Created reusable UI components, reducing development time by 40% across multiple projects.
- Conducted A/B testing, increasing conversion rates by 15% through data-driven UX enhancements.

## Education

# Nanyang Technological University

Singapore, Singapore

#### Bachelor Degree in Computer Science

2014 - 2018

#### Skills

Programming: JavaScript · TypeScript · Python · C++ · C#

Frontend: HTML · CSS · React.js · Vue.js · Angular · Next.js

UI/UX Frameworks & Libraries: Tailwind CSS · Bootstrap · Material UI · Ant Design

Backend Development: Node.js · Express.js · Django · Flask · FastAPI

Databases: MongoDB · MySQL · PostgreSQL · Firebase · Redis · Azure Cosmos DB

Cloud & DevOps: AWS Lambda · Docker · Kubernetes · GitHub Actions · Jenkins · Google Cloud Platform

Al & LLMs: OpenAl API · Claude · Hugging Face · LangChain · RAG · Vector Database · Al Integration · Prompt Engineering

Testing & Automation: Jest · Mocha · Supertest
